**Real-Time River Water Quality Monitoring and Control System**  
**Customer Problem Statement**

---

<b>I am</b>	<i>A Customer</i>	I need a quality monitoring and control system for river water.
<b>I am trying to</b>	<i>To check the quality of river water.</i>	I can avoid the water polluting in river and check the quality of water and keep safe.
<b>But</b>	I want to handle it easy.	To check the quality of water by using recent technologies.
<b>Because</b>	The river should monitoring and control automatically without manpower.	The river water can be detected before polluting.
<b>Which makes me feel</b>	Then my family, neighbors and people be safe .	It saves the river water and people health and other living beings.
